- ▶ **Law Of Improvement**
- ▶ **Law Of Inspiration**
- ▶ **Make Your Child Genius**
- ▶ **Career Development**
- ▶ **Mobile Addiction Remove**
- ▶ **Increase Concentration In study**
- ▶ **Therapy & Meditation**

Child Psychology Module 1

Mobile, TV, and Video Game Addiction:

Children aged 5 to 15 often become addicted to mobiles, TV, and video games.

Parents need to understand their child's psychology to address this issue effectively.

Example: The relationship between a crocodile and a crane highlights the importance of understanding each other.

2. Parental Expectations vs. Child's Reality:

Parents often expect their children to behave like adults.

This can lead to emotional and physical punishment, which is counterproductive.

Parents should interact with children at their level, treating them according to their age.

3. Changing Behavior:

Addressing root causes, like the parents' behavior, is crucial.

Emotional punishment and negative comparisons harm the child's self-esteem and belief system.

Positive reinforcement and understanding the child's activities and interests are key.

Child Psychology Module 2

Behavioral Issues and Their Root Causes:

Issues such as mobile addiction, video game addiction, and rude behavior stem from underlying psychological factors.

Changing behavior involves understanding and influencing the child's belief system and emotional center.

2. Parental Influence:

Parents' behavior significantly impacts their child's behavior.

Positive energy and thinking from parents can help foster good behavior in children.

Meditation and positive reinforcement can be effective tools.

Laws of Engagement, Adjustment, Improvement, and Inspiration

Law of Engagement:

Engaging children in activities that interest them is crucial.

This reduces the likelihood of addiction to mobiles and video games.

Law of Adjustment:

Parents should adjust their expectations and behaviors to better suit their child's needs.

Law of Improvement:

Continuous improvement in parenting techniques and understanding of the child's psychology is essential.

Law of Inspiration:

Inspiring children through positive actions and reinforcement.

Career Development:

Guiding children in choosing and developing their careers based on their interests and strengths.

Mobile Addiction Removal:

Strategies to reduce mobile addiction by engaging children in other activities.

Increasing Concentration in Study:

Techniques to enhance children's concentration and study habits.

Therapy & Meditation:

Utilizing therapy and meditation to address behavioral and psychological issues in children.
